Forest Collect Seedlings

NOTE—We do not recommend the planting of forest collected plants for a sure crop. Neither do we make a specialty of collected plants, but in some cases we find a demand for them and under ordinary conditions with proper care they will do fairly well. As almost all collected plants are somewhat crooked at the ground they should be cut back before transplanting. If you desire to plant out any collected seedlings, please give us your orders and we will do our best for you.
